New measures to simplify the production of energy from renewable sources

abreuadvogados.com/

This week was published the Decree-Law 30-A/2022 that will remain in force until April 19, 2024.

This Decree-Law approves exceptional measures aimed at simplifying (so it says) the procedures for installing and operating renewable energy power centers, self-consumption production units, hydrogen production from water by electrolysis and electricity transmission and distribution infrastructures.

Learn in detail about these new measures and get to know how you can apply it in your industry, through the summary that the Energy & Natural Resources team has prepared for you. [Learn more.](#)
