

European Commission presents Draft Guidelines on Prohibited Practices of Artificial Intelligence

abreuadvogados.com

On February 4th, the European Commission presented the first draft of the Guidelines on Prohibited Practices of Artificial Intelligence, provided for in Regulation 2024/1689 (commonly known as the “AI Act” or Artificial Intelligence Regulation).

The AI Act was published in the Official Journal of the European Union on July 12, 2024, and reflects the great evolution and centrality that the various Artificial Intelligence systems have been occupying in contemporary society. The Regulation has a dual mission: to regulate the harmful effects of AI systems in the EU and to promote innovation.

The Regulation establishes a risk-based approach:

- The prohibition of certain practices considered inadmissible (Article 5 - prohibited uses);
- The classification of AI systems according to their level of risk, imposing specific obligations for high-risk systems (Article 6), as well special transparency obligations for certain AI systems (Article 50) and general purpose AI models.

Article 5 and the need for practical guidelines

Article 5 of the Regulation sets out prohibited practices and their exceptions. However, **it does not provide guidance on the practical implementation of these provisions**. Instead, pursuant to Article 96/1/c of the AI Act, the responsibility for drafting such guidelines is delegated to the European Commission.

In this context, approximately six months after the AI Act entered into force (August 1, 2024) and just days after the applicability of its first provisions (February 2, 2025), the Commission presented the first draft of the Guidelines to clarify the practical implementation of Article 5.

It is important to recall that Article 5 establishes the following prohibited uses of AI:

Article 5º/1/a → Harmful manipulation, and deception

Article 5º/1/b → Harmful exploitation of vulnerabilities

Article 5º/1/c → Social scoring

Article 5º/1/d → Individual criminal offence risk assessment and prediction

Article 5º/1/e → Untargeted scraping to develop facial recognition databases

Article 5º/1/f → Emotion recognition

Article 5º/1/g → Biometric categorization

Article 5º/1/h → Real-time remote biometric identification (‘RBI’)

Thus, the Draft provides specific information for each prohibited use, with the following structure below:

(General) organization of the Annex regarding prohibited uses (art. 5/1):

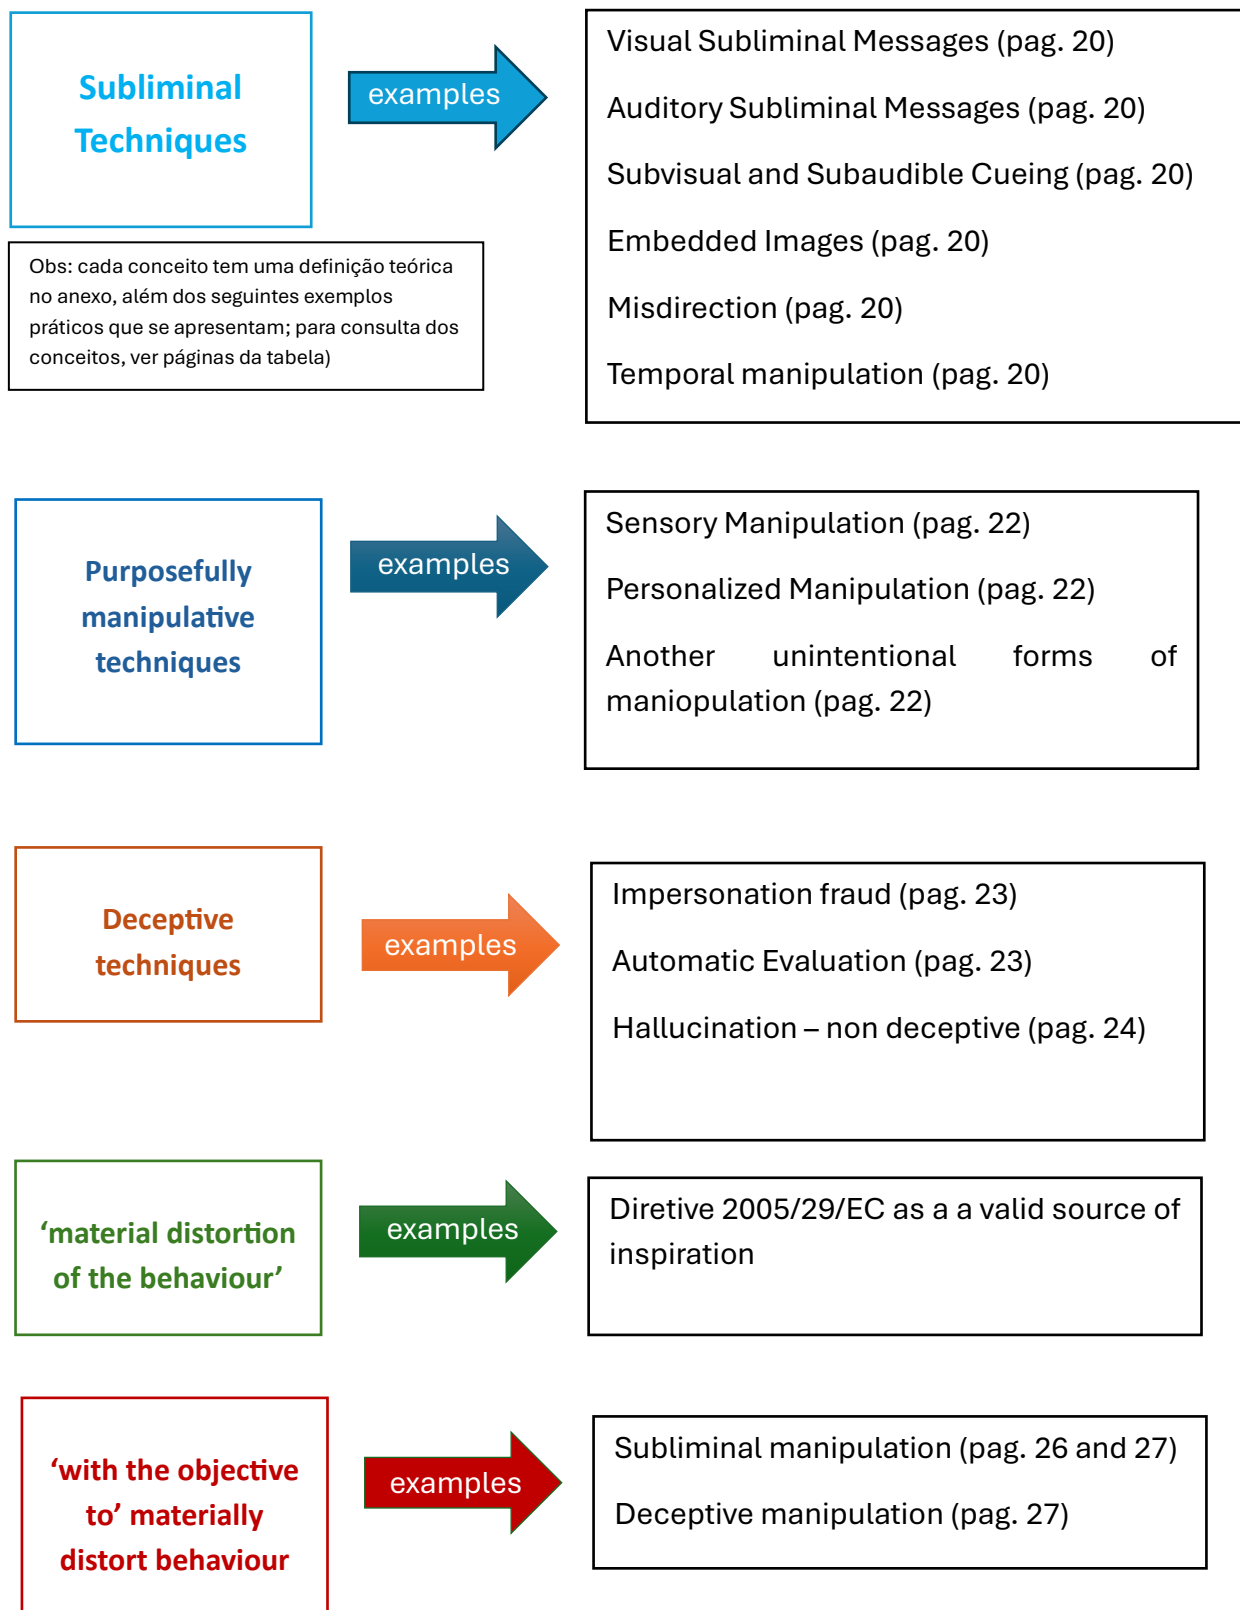

In addition to the in-depth analysis of prohibited uses, these Guidelines also provide essential guidance on the exceptions to prohibited uses (set out in Article 5/2 to 8).

Conclusion:

Although not yet a final version, this document represents a significant step towards the feasibility and precision of the practical application of the AI Act. The publication of these Guidelines will contribute to greater legal certainty in the application of Article 5.

Examples given by the Commission regarding (Article 5º/1/a)

**'with the effect of'
materially
distorting
behaviour**

examples

Exploitative coaching (pag. 27 and 28)
Autonomy impairment (pag. 28)

Types of harms

examples

Emotional dependency exploitation
Fraudulent marketing (29)
AI induced psychological and physical
harm (pag. 29 and 30)
AI driven harassment and exploitation
(pag. 29 and 30)

«significant harm»

examples

injuries or fatalities (pag.31)
a sufficiently serious impact on
individuals' health or the destruction of
property (pag.31)
AI systems that suggest to an individual to
commit criminal acts such as sexual
abuse and exploitation, extreme violent or
terrorist content or incentivise individuals
to commit crimes, self-harm or harm to
other persons should be considered to
reach such a threshold. (pag.31)

Thinking about tomorrow? Let's talk today.
